Item no. 300 024R

OPTIONAL

Mixer blades, Hardox-
steel
Item no. 300 024S

OPTIONAL

Dust Control
Item no. 300 001DL

The SoRoTo's 300 L mixer is one of the two models supplied with 400V and designed for larger assignments - and still it is easy to move around on the job site or from one job site to another, due ot the towbar.

The mixer can be towed behind a car with the removable tow-hook. It is equipped with three removable wheels. This makes it easy to move around a building site.

As an extra bonus for large building sites, this model is equipped with three lifting rings, so that it can be transported by crane.

It is equipped with and additional 230V outlet for supplying power to e.g. a vacuum cleaner, lighting or to a belt conveyor system.

The best mix is obtained in just 3-5 min.

The mixer arms may be removed without any use of tools if additional space for e.g. cleaning the mixer is required. .

The mixer arms may be replaced individually.

It is possible to change between rubber blandes and Hardox steel blades according to the mixture needed for the current job.

The 300 L mixer is also equipped with telescopic legs and may easily be adjusted to the best possible working height for the person operating the mixer at any time.

Item no. 300 000
(with rubber blades as standard)
